#### **Fund Manager's Comment**

The CMMF returned 21.37% in Q2 2024 compared to 16.90% printed in Q1 2024. Money market rate and yield on various T-bills maturities went slightly upward amid Central Bank of Nigeria's hawkish stance amid high inflation rate and depreciation of the exchange rate. Hence, we exploited this situation to boost Fund returns. Notably, we also positioned in Fixed Deposit placement to balance the risk of Weighted Average Maturities (WAM) and reward of high returns.

## Strategy

We expect money market rate and yield on various T-bills maturities to be stable at current levels in Q3 2024 but to marginally moderate in Q4 2024. Hence, we would exploit this situation to further key into T-bills securities and lock in rate for sale in Q4 2024.

We will position in relatively long-tenured Fixed Deposit placement as much as Weighted Average Maturities (WAM) can accommodate, to elongate reward of high return.

We will take position on the short to mid end tenors of quality high-yield CPs.
